The Winter's Tale, one of Shakespeare's later romantic comedies, offers a striking and challenging mixture of tragic and violent events, lyrical love-speeches, farcical comedy, pastoral song and dance, and, eventually, dramatic revelations and reunions.

The U.S. National Academies (NAS) and the Russian Academy of Sciences (RAS), building on a foundation of years of interacademy cooperation, conducted a joint project to identify U.S. and Russian views on what the international nuclear security environment will be in 2015, what challenges may arise from that environment, and what options the U.S. and Russia have in partnering to address those challenges. The project's discussions were developed and expanded upon during a two-day public workshop held at the International Atomic Energy Agency in November 2007. A key aspect of that partnership may be cooperation in third countries where both the U.S. and Russia can draw on their experiences over the last decade of non-proliferation cooperation. More broadly, the following issues analyzed over the course of this RAS-NAS project included: safety and security culture, materials protection, control and accounting (MPC&A) best practices, sustainability, nuclear forensics, public-private partnerships, and the expansion of nuclear energy.

Super Minds American English is a seven-level course for young learners. Written by a highly experienced author team, Super Minds enhances your students' thinking skills, improving their memory along with their language skills. For ease of use, this Level 6 Teacher's Book includes detailed lesson aims, clear instructions, and a vast array of extra activities. Class Audio CDs, including audio from the Student's Book and Workbook, are sold separately.

Capturing a unique historical moment, this book examines the changes in urban life since the collapse of the Soviet Union from an ethnographic perspective, thus addressing significant gaps in the literature on cities, Central Asia and post-socialism. It encompasses Tashkent, Almaty, Astana and Ulan-Ude: four cities with quite different responses to the fall of the Soviet Union. Each chapter takes a theme of central significance across this huge geographical terrain, addresses it through one city and contextualizes it by reference to the other sites in this volume. The structure of the book moves from nostalgia and memories of the Soviet past to examine how current changes are being experienced and imagined through the shifting materialities, temporalities and political economies of urban life. Privatization is giving rise to new social geographies, while ethnic and religious sensibilities are creating emergent networks of sacred sites. But, however much ideologies are changing, cities also provide a constant lived mnemonic of lost configurations of ideology and practice, acting as signposts to bankrupted futures. Urban Life in Post-Soviet Asia provides a detailed account of the changing nature of urban life in post-Soviet Asia, clearly elucidating the centrality of these urban transformations to citizens' understandings of their own socio-economic condition.

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

On her fourth Leap birthday, when she turns sixteen, Josie has a number of momentous experiences, including taking her driver's test, auditioning for a school play, and celebrating with her family and friends.

The X-Men are back in the cinema. Wolverine, Professor X, Cyclops, Jean Grey and the rest of the team return in X2, facing a new threat so dangerous that former enemy Magneto must join their ranks to defeat it.

Las Vegas provides the classic sophistication and darkness necessary for a deadly noir story. Stylish, sultry, brimming with ambition and greed, the characters who populate this literary Las Vegas are pushed to the extremes of human experience. From the neon glitter of the Strip to the treacherous views of Red Rock Canyon and Boulder City, from the desperation of Naked City to the racial tensions of the Westside, no other location offers so many different avenues leading to serious trouble.

This title is written for travelers, students, and lovers of language who will soon find this dictionary to be indispensable. This eBook features 15,000 words and concepts sorted into 13 clearly formatted and color-coded categories. These categories are easily navigable by clicking on the links in the Table of Contents. The eBook also features 3,000 full-color pictures that provide helpful visualization for instant recognition.
