Windows commands | Microsoft Docs

Open Command Prompt. Head over to the Start menu. Search "cmd" there. You can also hit Run, then search for it. If both of those don't work, you will need a slightly more complex method. Open Notepad. On the top line write "Command.com" (without the quotation marks.) Save it as CMD.bat. The .bat part is VERY important. And that's it.

How to Use CMD (Beginner): 9 Steps (with Pictures) - wikiHow

Usage []. In the client, commands are entered via the chat window, which is displayed by pressing the T key (default) or, in Java Edition, / key. Using the / key also enters the forward-slash that commands require as a prefix, so it is a useful shortcut. The ? and ? keys can be used to view previously entered text, including all previously executed commands.
