Now in its tenth edition, Auditing is a comprehensive textbook which provides thorough up-to-date coverage of auditing in an accessible style. The book clearly explains the key features of auditing in short, easily readable sections that promote effective learning. The increasing content of auditing courses has led to a need for a broad textbook which is aimed at the needs of today's auditing students. With this in mind, Auditing is a concise but thorough approach to understanding of auditing and practice. Auditing is ideally suited for auditing modules on undergraduate, postgraduate and professional courses in accounting and finance throughout the world. It is also ideal for use by practitioners on professional auditing courses.

The eleventh edition of Auditing provides a simplified but thorough approach to students understanding of auditing theory and practice. It clearly explains the key features of auditing in short, easily accessible sections to encourage effective learning. The authors have sought to provide a comprehensive textbook with up-to-date research. Auditing has been completely updated to reflect recent changes in international standards, regulatory processes and corporate governance as well as developments in the field of auditing. The new edition is ideal for anyone studying modules in auditing at undergraduate or postgraduate level, or those preparing for professional examinations set by accounting bodies such as

ACCA.

Now in its twelfth edition, Auditing continues to live up to its reputation for being comprehensive, yet accessible. It has been thoroughly updated to reflect recent changes in international standards, audit reporting and governance. With engaging real-world examples and a new chapter on public auditing, this edition is a must-have for anyone studying auditing at undergraduate or postgraduate level and for those preparing for professional examinations set by accounting bodies such as ACCA and CIMA.

This text provides coverage of the theory and practice of accounting at Foundation level. Graded exercises and examination questions provide practice and self-review. The book is used on courses such as ACCA, CIMA, AAT, ICSA, BA Accounting and Business Studies, BTEC HNC/D Business and Finance and IComA.

This is a key textbook for specialist students of accounting and finance, either undergraduate or professional, taking a first course in auditing. In this fourth edition the authors continue to provide a refreshing, imaginative and thorough introduction to the audit process, with a rational and coherent foundation for the appreciation of auditing practice. This Revised ISA edition is entirely up to date with changes post-Enron, with new international auditing standards and IFRS replacing UK accounting standards for the first time. With the aid of numerous examples, case studies and questions, The Audit Process: Principles, Practice and Cases provides a realistic and thought-provoking insight into the individual components of the auditing process in the context of the entire audit. A major strength of the book is its questioning approach, designed to encourage the
