Bank management governs various concerns associated with bank in order to maximize profits. The concerns broadly include liquidity management, asset management, liability management and capital management. We will discuss these areas in later chapters.

Bank Management - Introduction - Tutorialspoint

In general, bank management refers to the process of managing the Bank's statutory activity. Bank management is characterized by the specific object of management - financial relations connected with banking activities and other relations, also connected with implementation of management functions in banking.

What is Bank Management - FA Consult

Credit management is the process of monitoring and collecting payments from customers. A good credit management system minimizes the amount of capital tied up with debtors. It is very important to have good credit management for efficient cash flow. There are instances when a plan seems to be profitable when assumed theoretically but practical execution is not possible due to insufficient funds.

Bank Management - Credit - Tutorialspoint

A disciplined trader who employs good bank management is unlikely to ever lose his or her bank, but many who are new to football trading blow a bank or two before the 'light bulb' moment when it all starts to come together. This is perfectly normal.
