Briggs & Stratton have two inverter generator models which have this capability also: their 2200w and 3000w can be paired via a Briggs & Stratton parallel cable. In this example, the smaller P2200i model and the larger P3000i model can be paired, however this is uncommon as the increase in power is not hugely beneficial and therefore the most popular pairing combo is two generators of the same size.

Anyone know anything about a Craftsman front tine tiller. It has a 5hp Briggs and Stratton motor, model 135202, and the tillers model number is 917.295350. It starts up on the first pull but the motor will either be full throttle or die if you idle it down. What do I need to do? I am looking for a owners manual and maybe the date of manufacturing.
