Expertly arranged Trumpet Solo by Théo Charlier from the Kalmus Edition series.

A complete pedagogical method for students of trumpet and cornet, this "brass bible" contains hundreds of exercises from basics to advanced. Includes the author's famous arrangement of Carnival in Venice.

Unlike the violin, which has flourished largely unchanged for close to four centuries, the trumpet has endured numerous changes in design and social status from the battlefield to the bandstand and ultimately to the concert hall. This colorful past is reflected in the arsenal of instruments a classical trumpeter employs during a performance, sometimes using no fewer than five in different keys and configurations to accurately reproduce music from the past. With the rise in historically inspired performances comes the necessity for trumpeters to know more about their instrument's heritage, its repertoire, and different performance practices for old music on new and period-specific instruments. More than just a history of the trumpet, this essential reference book is a comprehensive guide for musicians who bring that musical history to life.

There are many books written for the Piano, Violin, etc., entirely devoted to Technic. This Work is especially written to enable the Student, by practice and application, to overcome any obstacle

which may occur in musical passages written for the Cornet. By controlling the Wind Power to play these Exercises as written, in one breath, the Student will acquire ENDURANCE without strain or injury. Train the Muscles which control the Lips, to make them elastic and strong, as only a slight pressure is necessary, and not brute force. The highest as well as the lowest notes can be played with equal tone quality if practiced according to the instructions that precede each Study. Every Cornet Player should have reached a degree of excellence before attempting to play these Exercises. To become an Expert on the Cornet, one should be familiar with as many Cornet Methods as possible, and so gain the experience of each. Every Exercise in this Book is possible, and not so very difficult if practiced slowly at first, and not too long at a time. I have used them for my daily practice for years, and they have been the means of my reaching the highest notes after playing a two-hour Concert, also of preserving my lips so that they never tire, and what has been a help to me is surely good for other Cornet Players. You cannot expect to attain the highest point of excellence without hard work and perseverance. Never be perfectly satisfied with yourself. Try to make some improvement each day, feeling that it is a pleasure to have conquered that which seemed an impossibility at first. Do not neglect to correct immediately the least fault you make. Bad habits are easily formed, but are difficult to remedy. There are few Celebrated Cornet Soloists, although thousands play the instrument. Most players abuse their practicing by not knowing the proper way, and neglecting to pay more attention to the elementary work. These Studies have been found to be excellent for Clarinet Players as well as Cornet Players. The Clarinet being a Wind Instrument also, all these Exercises will appeal to the Player of that Instrument by following the same instructions.

rhythm, precise multiple-tonguing and flexible technique make this book important to tubists. Many of these studies are based upon passages from famous orchestral works such as the Ride of the Valkyries (and others). Most studies can be performed on both low and high tubas.
