'Cinematography' is a comprehensive resource for cinematographers, directors, videographers, and students. It covers the entire range of cinematography as practiced on a professional level.

This book covers both the artistry and craftsmanship of cinematography and visual storytelling. Few art forms are as tied to their tools and technology as is cinematography. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from author and filmmaker Blain Brown. This 4th edition has been thoroughly updated throughout to include detailed information on the latest lighting and camera equipment, as well as expanded and updated discussion on the following areas: shooting on a budget, color spaces with emphasis on the new UHD standards, the decision-making process in choosing what lights and equipment to use, considerations concerning power issues, safety and what electrical supply is needed for various types of lights, an examination of the cinematographer's role in preproduction, and much more. Topics Include: - Visual storytelling - Continuity and coverage - Cameras and digital sensors - The tools and basics of film lighting - Methods of shooting a scene - Continuity and coverage - Exposure - Color - Understanding digital images - Using linear, gamma, and log video - Image control and grading on the set - Data management and the DIT - Optics and focus - Camera movement - Set operations - Green screen, high speed, and other topics. Whether you are a student of filmmaking, someone just breaking into the business, working in the field and looking to move up the ladder, or an experienced filmmaker updating your knowledge of tools and techniques, this book provides both the artistic background of visual language and also the craft of shooting for continuity, lighting tools and methods, and the technical side of capturing images

on digital or on film. The companion website (www.routledge.com/cw/brown) features additional material, including lighting demonstrations, basic methods of lighting, methods of shooting a scene, using diffusion, and other topics.

There's more to being a DP than holdng a light meter! With this book as your guide, you are on your way to learning not only about the equipment and technology, but also about the concepts and thought processes that will enable you to shoot professionally, efficiently, and with artistic mastery. A leading book in the field, Cinematography has been translated into many languages and is a staple at the world's top film schools. Lavishly produced and illustrated, it covers the entire range of the profession. The book is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice, so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their Director of Photography. Cinematography presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations and diagrams to reveal the real world of film production. Recognizing that professionals know when to break the rules and when to abide by them, this book discusses many examples of fresh ideas and experiments in cinematography. Covering the most up-to-date information on the film/digital interface, new formats, the latest cranes and camera support and other equipment, it also illustrates the classic tried and true methods.

High end digital cinematography can truly challenge the film camera in many of the technical, artistic and emotional aspects of what we think of as 'cinematography'. This book is a guide for practising and aspiring cinematographers and DOPs to digital cinematography essentials - from how to use the cameras to the rapidly emerging world of High Definition cinematography and 24p technology. This book covers the `on-the-set' knowledge you need to know - its emphasis lies in practical application, rather than descriptions of technologies, so that in this book you will find usable `tools' and information to help you get the job done. From `getting the look' to lighting styles and ratios, what is needed for different types of shoots and the technical preparation required, this is a complete reference to the knowledge and skills required to shoot high end digital films. The book also features a guide to the Sony DVW in-camera menus -

showing how to set them up and how they work - a device to save you time and frustration on set. Paul Wheeler is a renowned cinematographer/director of photography and trainer, he runs courses on Digital Cinematography at the National Film & Television School and has lectured on the Royal College of Art's MA course and at The London International Film School. He has been twice nominated by BAFTA for a Best Cinematography award and also twice been the winner of the INDIE award for Best Digital Cinematography.

"Shooting Movies" is the book for all those film enthusiasts who can't get on a professional set or can't undertake studies at an expensive film school. This book approaches the subject of cinematography from a 'hands-on, in the trenches' viewpoint, as though the reader were an apprentice on the set. It's a book about learning to shoot a film without making an idiot of yourself and wasting lots of time and money. It's a book about how to take artistic inspiration and make it a reality. A breezy writing style mixed with practical, interactive exercises geared for both film and video give filmmakers the experience they need to take their work to the next level. Beginning with fundamental techniques and concepts of cinematography, the author shares his many years of experience with the reader, imparting invaluable advice and guidance on how to avoid common pitfalls, and more importantly, learn from mistakes. This title provides a mentorship-in-a-book approach not found any of the other technical guides to cinematography, using both film and video exercises. It is written for filmmakers working on a budget. Unique exercises throughout the book provide the reader with an interactive experience that will give them a higher level of expertise and will improve the quality of their shooting, lighting, and reel - all on a budget. It helps you learn the realty

of filmmaking from the cinematographer's perspective. Companion website showcases video samples, visual demonstrations of the exercises in the book, and further video explanations of the concepts that are better explained visually.

This classic in film theory, presents a systematic study of the techniques of the film medium and of their potential uses for creating formal structures in individual films such as Dovzhenko's Earth, Antonioni's La Notte, Bresson's Au Hasard Balthazar, Renoir's Nana, and Godard's Pierrot le Fou. Originally published in 1981. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Today's successful cinematographer must be equal parts artist, technician, and business-person. The cinematographer needs to master the arts of lighting, composition, framing and other aesthetic considerations, as well as the technology of digital cameras, recorders, and workflows, and must know how to choose the right tools (within their budget) to get the job done. David Stump's Digital Cinematography focuses on the tools and technology of the trade, looking at how digital cameras work, the ramifications of choosing one camera versus another, and how those choices help creative cinematographers to tell a story. This book empowers the reader to correctly choose the appropriate camera and

workflow for their project from today's incredibly varied options, as well as understand the ins and outs of implementing those options. Veteran ASC cinematographer David Stump has updated this edition with the latest technology for cameras, lenses, and recorders, as well as included a new section on future cinematographic trends. Ideal for advanced cinematography students as well as working professionals looking for a resource to stay on top of the latest trends, this book is a must read.
