Traditional Logic, Book II: Advanced Formal Logic, by Martin Cothran, is a continuation of Memoria Press' Traditional Logic, Book I. It covers the four figures of the traditional syllogism, the three forms of rhetorical arguments (called enthymemes), the three kinds of hypothetical syllogisms, the four kinds of complex syllogisms, as well as relational arguments.

Elementary Logic Second 2nd Edition

This text is designed for the Critical Thinking and Logic courses found in philosophy and general education departments at both universities and colleges. The most unique feature of the text is its solid foundation in logic. The discussion of fallacies is integrated with logic in a way not seen in other texts.

Argument: Critical Thinking, Logic, and the Fallacies ...

training in science and math. The examples are all taken from linguistics and philosophy. Ironically, the author is also a high power mathematician, but he does not let that show.

Logic: An Introduction to Elementary... book by Wilfrid Hodges

The second edition takes account of new work from the last decade, and presents the old material with even greater clarity." Dorothy Edgington, University of Oxford "Logical Forms is written in a way that makes the dry, abstract problems of philosophical logic accessible. It is one of the best books of its kind and is thoroughly recommended."

Hierarchies of Model Theoretic Definability—an Approach to ...

The analysis shows that if second-order logic is understood in its full semantics capable of characterizing categorically central mathematical concepts, it relies entirely on informal reasoning. On the other hand, if it is given a weak semantics, it loses its power in expressing concepts categorically. ... On extensions of elementary logic ...
