Our relationship to food is filled with confusion and insecurity. Vegan or carnivore? Vegetarian or gluten-free? Keto or Mediterranean? Fasting or Paleo? Every day we hear about a new ingredient that is good or bad, a new diet that promises everything. Our conversations are filled with a dizzying array of approaches to and perspectives on our relationship with food. But the truth is that none of those labels matter. In *Eat Like a Human*, archaeologist and primitive technologist Dr Bill Schindler draws on cutting-edge science and a lifetime of research to explain how safety, nutrient density and bioavailability are the cornerstones of a healthy diet. He shows readers how to live like modern 'hunter-gatherers' by using the same strategies our ancestors used - as well as techniques still practiced

A New Scientist Best Book of 2020 Our evolutionary ancestors once possessed the ability to intuit what food their bodies needed, in what proportions, and ate the right things in the proper amounts—perfect nutritional harmony. From wild baboons to gooey slime molds, most every living organism instinctually knows how to balance their diets, except modern-day humans. When and why did we lose this ability, and how can we get it back? David Raubenheimer and Stephen Simpson reveal the answers to these questions in a gripping tale of evolutionary biology and nutritional science, based upon years of groundbreaking research. Their colorful scientific journey takes readers across the globe, from the foothills of Cape Town, to the deserts of Arizona, to a state-of-the-art research center in Sydney. Readers will encounter locusts, mice and even gorillas along the way as the scientists test their hypotheses on various members of the animal kingdom. This epic scientific adventure culminates in a unifying theory of nutrition that
