The starting point of String Theory is the assumption that the basic objects have a one-dimensional extension, that they are like small pieces of rope. This principle allows two kinds of fundamental objects: open and closed strings. When such objects move through space they sweep out ribbons or cylinders. Particle Open string Closed string

1 Introduction String theory is hoped to be a
consistent theory of quantum gravity, with
the special feature that it strongly
constrains the matter it can couple to.

Although direct experi-mental tests of new
predictions seem out of reach for the moment,
it can at least be tested
