"A concise, well-written history of U.S. working-class struggle and radicalism" from the author of *Women and Socialism: Class, Race, and Capital (Solidarity)*. Smith explores how the connection between the U.S. labor movement and the Democratic Party, with its extensive corporate ties, has repeatedly held back working-class struggles. And she closely examines the role of the labor movement in the 2004 presidential election, tracing the shrinking electoral influence of organized labor and the failure of labor-management cooperation, "business unionism," and reliance on the Democrats to deliver any real gains. "Sharon Smith brings that history to life once again, blasting through the myths of the working class that Trump-era narratives cling to in order to connect us once again to the possibility of building broad solidarity." —Sarah Jaffe, author of *Work Won't Love You Back* "A veteran worker-intellectual brilliantly addresses the crisis of the labor movement, skewering those who believe that renewal can come from the top down, and encouraging those who are fighting to rebuild it from the bottom up." —Mike Davis, author of *Planet of Slums*

The chaise-longue by Le Corbusier, the radio by Rams, the chair by Eames – designers make things into cult objects and become icons themselves. But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

This book provides a unique historical and qualitative review of ten foreign automakers with plants in developed North America from their early beginnings to their export entry into North America. It seeks to expand the knowledge of American and Canadian policymakers pursuing a new foreign motor vehicle assembly plant or Foreign Direct Investment.
