A motion tween is a type of Flash-generated animation in CS6 that requires the use of symbols and is best for creating movement, size, and rotation changes, fades, and color effects. All you need to do is tell Flash where to change the appearance of a symbol instance, and it fills in the blanks in between key changes in the symbol's appearance to create an animation sequence.

How to Create a Motion Tween in Adobe Flash CS6 - dummies

A guide layer is a layer that's invisible in the final, published Flash animation. You can use guide layers for several purposes: Animation: You can place a path on a guide layer to control the motion of an object during animation. Layout: Although you can display guides on the screen to help you draw precisely, [1]

Creating and Using Guide Layers in Flash CS3 - dummies

Choose Edit>Paste in Place to paste the path you created earlier. Flash automatically converts the path to a motion path, and your symbol snaps to the path. Jambone Creative</>. Credit: Logo and illustration courtesy of Jambone Creative. Press Enter or Return to play your movie. The symbol follows the path you created.

How to Animate along a Path in Adobe Flash CS6 - dummies

Motion Tween: A motion tween is a feature available in Adobe Flash (formerly Macromedia Flash) that allows you to easily animate the motion of an object. Instead of defining the location of the object in every frame, you can create a motion tween, which will automatically move the object from the beginning location to ending location.
