A child explains what angers him and how he sometimes angers other people.

This edited collection explores how narratives about the future of the Arctic have been produced historically up until the present day. The contemporary

deterministic and monolithic narrative is shown to be only one of several possible ways forward. This book problematizes the dominant prediction that there will be increased shipping and resource extraction as the ice melts and shows how this seemingly inevitable future has consequences for the action that can be taken in the present. This collection looks to historical projections about the future of the Arctic, evaluating why some voices have been heard and championed, while others remain marginalised. It questions how these historical perspectives have shaped resource allocation and governance structures to understand the forces behind change in the Arctic region. Considering the history of individuals and institutions, their political and economic networks and their perceived power, the essays in this collection offer new perspectives on how the future of the Arctic has been produced and communicated.

Meet Zesty Tastee, flamboyant gay playboy and heir to the Tastee Corporation fortune. That's what the world knows of him, but Zesty is also Magpie, the corporate saboteur who fights against his father's corrupt business practices. Zesty's evil tycoon dad is out to destroy an entire rainforest, and he's joined up with a mysterious sect of ninjas to help keep 'Magpie' from interfering. Prince Ander is the sect agent on the case and Zesty has love at first sight for this dreamy ninja master. Zesty can't understand why anyone as noble as Prince would ever work with his father. His mission is to find out the secret of the rain forest, and win Prince's heart in the process!

Between the years of 1447 (Nicholas V) and 1572 (Pius V) Rome was transformed from a ruined Medieval city. The Vatican became the official home of the church and the world's largest bureaucracy, a spectacular new Basilica of St Peter's took 100 years to build and Michelangelo changed the course of art history with his Sistine Chapel. So vast and expensive was this cultural explosion that a new fundraising initiative was launched: the sale of indulgences. The Renaissance Popes were statesmen, warriors, patrons of the arts as well as churchmen. These were earthly times and the reputations of popes like Alexander VI, the infamous Borgia patriarch, and Julius 'Il Terribile' II for murder, poison, sodomy and simony vary only in degree. Meanwhile, the sin of heresy, which threatens the very core of the Catholic soul, was tirelessly targeted by two other lasting innovations of the period: the Inquisition and witch-hunts. Alexander VI, father of the ruthless Cesare and Jezebel Lucrezia, is seen to this day as the embodiment of this iniquity. But Gerard Noel shows this is unjust, and based on false confessions and historical myth. What's more, Alexander created the blueprint for reform -- the first of its kind -- that would eventually lead to the Counter-Reformation. In his survey of the colourful reigns of the seventeen Renaissance Popes and his examination of the great Borgia myth Noel brings to light the true legacy -- political, artistic, religious -- of an extraordinary time.

With the warmth, wit, intimate friendships, and heart-melting romance she brings to all her books, Emma Mills crafts a story about believing in yourself, owning your mistakes, and trusting in human connection in *Lucky Caller*. When Nina decides to take a radio broadcasting class her senior year, she expects it to be a walk in the park. Instead, it's a complete disaster. The members of Nina's haphazardly formed radio team have approximately nothing in common. And to maximize the awkwardness her group includes Jamie, a childhood friend she'd hoped to basically avoid for the rest of her life. The show is a mess, internet rumors threaten to bring the wrath of two fandoms down on their heads, and to top it all off Nina's family is on the brink of some major upheaval. Everything feels like it's spiraling out of control—but maybe control is overrated?
