~~On initial start-up, allow the refrigerator to cool for 8-12 hours on the coldest temperature setting before loading it with food. Warm foods, high ambient temperatures, and frequent door openings will increase the cooldown time. Do not cover the shelves with plastic, paper, etc. If the unit does not start to cool after two hours, contact your dealer or a Norcold authorized service center.~~

The first thing to know is that the cooling units on every Norcold gas absorption refrigerator are gravity operated and MUST be level in order to run properly. The second thing you need to understand is that the refrigerator will not cool properly if it is too hot outside (typically over 90 degrees F ambient).
