Fasting And Educational Outcomes

If fasting is the main mechanism through which Ramadan affects academic performance, our results are informative about the relation between nutrition and educational outcomes.

Based on previous research, we hypothesize that observing Ramadan, and especially observing the fast, will

For identification we exploit that the number of Ramadan weeks during the course that we study, varies from year to year, ranging from zero to four. Our main finding is that Ramadan observance has a negative impact on performance; one additional Ramadan week lowers the final grade of Muslim students by almost 10% of a standard deviation.

This is the major objective of fasting in Ramadan as clarified by the Qur'an. God said, "O you who have believed, decreed upon you is fasting as it was decreed upon those before you that you may become righteous [muttaqūn]."2 Fasting also teaches a person how to have taqwā because while one is fasting they are careful about all kinds of things. They watch what comes out of their mouth, what they look at, and all that they do.
