Here's what Rewire the Anxious Brain teaches: The field of neuroscience has revealed an extraordinary amount of information about how our brains process information. It teaches us that we have a cortex in the front of the brain that is the thinking part and an amygdala in the middle of the brain that is the emotional part. The amygdala ...

[This is How to Rewire Your Anxious Brain](#)

The authors add three ways to resist cortex-based (conscious thought) panic attacks: (1) change your focus (concentrating on using a Crutch will do it); (2) stop worrying about other people's opinions; and (3) change your thoughts, such as change the subject in your mind, which can be done on the spot or in advance via mediation (which presumably would include auto suggestion and self-hypnosis).

[Rewire Your Anxious Brain: How to Use the Neuroscience of ...](#)

Our brains are hardwired to feel anxious from time to time - for our protection... that's just part of who we are. When you feel anxious it's because your body is responding to a stimulus(something that you view as being negative - a trigger), which activates the stress response.

[How to Rewire Your Brain to Feel Less Anxious | Graduated ...](#)

Here's how this intervention changes your brain. When something triggers anxiety, like thinking about how much work you have to do, your brain starts responding automatically by activating your fight-or-flight response. This process of going through 7 steps pulls your frontal cortex (the part of the brain that helps us solve problems) back online.
