Spontaneous speech errors provide

valuable evidence not only for the processes that mediate between a communicative intention and the articulation of an utterance but also for the types of grammatical entities that are manipulated during production. This study proposes an analysis of speech errors that is informed by grammar theory. In particular, it is shown how characteristic properties of erroneous German utterances can be accounted for within Distributed Morphology (DM). The investigation focuses on two groups of errors: Errors that result from the manipulation of semantic and morphosyntactic features, and errors which appear to involve the application of a post-error repair strategy. It is argued that a production model which incorporates DM allows for a straightforward

account of the attested, sometimes complex, error patterns. DM mechanisms, for instance, render unnecessary the assumption of repair processes. Besides providing an account for the attested error patterns, the theory also helps us in explaining why certain errors do not occur. In this sense, DM makes for a psychologically real model of grammar.

Myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS) is a severe chronic health condition that is often misunderstood or ignored by health establishments. The lack of definitive diagnostic markers to separate ME/CFS patients from the healthy population as well as from other chronic disorders is problematic for both health professionals and

researchers. A consortium of Australian researchers gathered to systematically understand ME/CFS, ranging from a deep analysis of clinical and pathology data to metabolomic profiles and the investigation of mitochondrial function. From this broad collaboration, a number of compelling insights have arisen that may form the basis of specific serum, blood, and/or urinary biomarkers of ME/CFS. This Special Edition reports on a conference centred on these biomedical discoveries, with other contributions, with a translation focus for predictive markers for ME/CFS diagnosis. By supporting health professionals with developments in diagnostics for this condition, the patients and their families will hopefully benefit from an improved

recognition of the biomedical underpinnings of the condition and will be better able to access the care that is urgently required. This Special Edition contains a mix of speaker submissions and other accepted manuscripts that contributed to our objective of advancing biomedical insights to enable the accurate diagnosis of ME/CFS.

On 16 October 1946 Joachim von Ribbentrop, Hitler's wartime Foreign Minister, was executed at Nuremberg, convicted on four counts including deliberately planning a war of aggression and war crimes. In this first English Language edition of his memoirs, Rudolf von Ribbentrop frankly describes his relationship with his father when he was the German Ambassador in London and during the

war years. Von Ribbentrop was an often isolated figure among the Nazi elite. In his final report from London von Ribbentrop informed Hitler that he was convinced that Great Britain would fight for its position in the world. He went on to play a key role forging the short-lived pact with Stalin's Soviet Union. Far from being uncritical, the author, now in his 90s, sets out to paint an objective picture of his father's role. His unique position throws fascinating light on the unfolding dramatic events leading up to, and then the execution of, the Second World war. While the author briefly describes his personal experiences including his war service with the SS, it is the insight this work provides into top level decision making at the heart of the Third Reich that will appeal most to both

Gemessen an dem Ideal (1. Kapitel) und den Fakten zu Hirntod und Organspende (2. Kapitel) wird in diesem Buch die Demontage von Gruppen und Personen - ob bewusst oder unbewusst betrieben - an der Organspende offengelegt. Die Demontage reicht bis zur Diffamierung der Organspender. Diese Demontage bleibt nicht nur bei den Worten, sondern hat auch für die bei Eurotransplant auf der Warteliste stehenden Patienten tödliche Folgen . Diese Verkettung wird im Buch aufgezeigt. Um mehr auf der Warteliste stehenden Menschen durch eine Organspende das Leben retten zu können, müssen wir uns gesellschaftlich geschlossen hin zu einer "Sympathie für die Organspende" (Josef Theiss)
