The EGO FUNCTION ASSESSMENT MANUAL & the EFA Blank (each book comes complete with one copy of the blank) is based upon extensive research on operational definitions & quantitative statements for 12 of the most important ego functions. Bellak's Ego Function Assessment (EFA) method has been described as a valuable "bridge between descriptive & dynamic personality assessment." EFA is the result of three years of research by as many as 20 professionals, supported by nearly a million dollars of NIMH grants. 12 ego functions were culled from repeated assessments to arrive at the 12 functions with high construct validity & interrater reliability, namely: Reality Testing-Judgment-Sense of Reality-Regulation & Control of Drives-Object Relations-Thought Processes-ARISE (Adaptive Regression in the Service of the Ego)-Defensive Functions-Stimulus Barrier-Autonomous Functions-Synthetic Functions-Mastery Competence. The original research reported in SCHIZOPHRENICS, NEUROTICS & NORMALS (Bellak, Hurvich & Gediman, Wiley 1973) & THE BROAD SCOPE OF EGO FUNCTION ASSESSMENT (Bellak & Goldsmith, Wiley, 1984) are somewhat cumbersome for the working clinician. The EFA Manual makes it practical for the clinician, serving as a guide for assessment & as a record of the level of functioning. In this form it has been used by the New York City Police Department, as well as departments in the city of New Orleans.

Rev. ed. of: Best practice occupational therapy. c2000.

Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

Respiratory Care Clinical Competency Lab Manual provides the practical skills needed to apply classroom theory to clinical practice. This text has the flexibility to be used in conjunction with all other respiratory care titles, as well as in other disciplines that require competencies in respiratory therapy. With detailed, step-by-step procedures, supporting procedural illustrations, hands-on lab exercises, case studies, and critical thinking questions, this text helps you understand and apply theoretical knowledge by demonstrating specific skills. Procedural competency evaluation forms help you to assess your progress and performance of specific procedures. Detailed, structured lab activities provide hands-on opportunities to assess psychomotor and patient communication skills in a controlled environment. Content correlation to NBRC combined CRT/RRT exam content outlines helps you better prepare for credentialing exams. Step-by-step procedural competencies prepare you for the RT competency areas established by the American Association of Respiratory Care (AARC) and meet the national practice standards for patient care. Up-to-date coverage of current technology, equipment, Clinical Practice Guidelines (CPGs), CPR guidelines, and CDC recommendations, and mass casualty/disaster management equips you with the most state-of-the-art training for respiratory care. Integration of case-based questions within the lab activities helps you develop and promote your critical thinking abilities. UNIQUE! Coverage of polysomnography addresses clinical evaluation in this expanding specialty area. Over 200 images provide visual guidance on how to perform procedures. UNIQUE! Reality Check boxes arm you with practical knowledge on real-world application of various procedures. UNIQUE! Tip boxes supply you with helpful pointers for the clinical arena. Glossary of terms offers quick reference to terms presented in the text.

The National Science Education Standards address not only what students should learn about science but also how their learning should be assessed. How do we know what they know? This accompanying volume to the Standards focuses on a key kind of assessment: the evaluation that occurs regularly in the classroom, by the teacher and his or her students as interacting participants. As students conduct experiments, for example, the teacher circulates around the room and asks individuals about their findings, using the feedback to adjust lessons plans and take other actions to boost learning. Focusing on the teacher as the primary player in assessment, the book offers assessment guidelines and explores how they can be adapted to the individual classroom. It features examples, definitions, illustrative vignettes, and practical suggestions to help teachers obtain the greatest benefit from this daily evaluation and tailoring process. The volume discusses how classroom assessment differs from conventional testing and grading- and how it fits into the larger, comprehensive assessment system.

Physical Therapy Clinical Handbook for PTAs, Fourth Edition is a concise clinical guide designed specifically to help physical therapist assistant students and practitioners easily obtain helpful evidence-based information.

Prepare for practice with the book tailored specifically for physical therapist assistants! Physical Rehabilitation for the Physical Therapist Assistant provides a clear, easy-to-read, evidence-based guide to the PTA's role in patient management, covering the core concepts related to physical rehabilitation and emphasizing the PTA's role in intervention. A treatment-oriented focus addresses each of the four categories of the American Physical Therapy Association (APTA) Preferred Practice Patterns: musculoskeletal, neuromuscular, cardiopulmonary, and integumentary. The final section of the book addresses interventions which overlap many practice patterns. Written by rehabilitation experts Michelle Cameron, MD, PT and Linda Monroe, MPT, in consultation with Susan Schmidt, a practicing PTA, and Carla Gleaton, the director of a PTA education program, this text will be a valuable resource both in the classroom and in professional practice. Comprehensive, evidence-based coverage of rehabilitation includes sections on pathology; examination; evaluation, diagnosis, and prognosis; clinical signs, and intervention -- emphasizing the PTA's role in intervention. Unique! A consistent, organized approach covers physical therapy intervention by disorder, with full discussions of each condition found in a single chapter. Format follows the Guide to Physical Therapist Practice, 2nd Edition so you become familiar with the terminology used in therapy practice. Clinical Pearls highlight key information. Unique! Full-color illustrations clearly demonstrate pathologies and interventions. Case studies with discussion questions guide you through specific patient interactions to build your clinical reasoning skills. Glossaries in each chapter define key terms to build your clinical vocabulary. Unique! Student resources on the companion Evolve website enhance your learning with vocabulary-building exercises, boards-style practice test questions, examples of commonly used forms, and references from the book linked to Medline.
