This book constitutes the refereed proceedings of the 22nd Australasian Joint Conference on Artificial Intelligence, AI 2009, held in Melbourne, Australia, in December 2009. The 68 revised full papers presented were carefully reviewed and selected from 174 submissions. The papers are organized in topical sections on agents; AI applications; computer vision and image processing; data mining and statistical learning; evolutionary computing; game playing; knowledge representation and reasoning; natural language and speech processing; soft computing; and user modelling.

Many aspiring game designers have crippling misconceptions about the process involved in creating a game from scratch, believing a “big idea” is all that is needed to get started. But game design requires action as well as thought, and proper training and practice to do so skillfully. In this indispensible guide, a published commercial game designer and longtime teacher offers practical instruction in the art of video and tabletop game design. The topics explored include the varying types of games, vital preliminaries of making a game, the nuts and bolts of devising a game, creating a prototype, testing, designing levels, technical aspects, and assessing nature of the audience. With practice challenges, a list of resources for further exploration, and a glossary of industry terms, this manual is essential for the nascent game designer and offers food for thought for even the most experienced professional.

Includes easy-to-read instructions and illustrations of strategy for 101 card games.
