findings on space exploration and research and cutting-edge, spectacular views of the universe that technology is bringing back to Earth, all in one ultimate reference book.

~~Space Encyclopedia : A Tour of Our Solar System and Beyond ...~~

Science Encyclopedia: A Tour of Our Solar System and Beyond is an interesting book written by David. An Aguilar. First, the book talks about how everything; it started with a big bang. The big bang wasn't like a dynamite explosion, but it like a giant balloon inflating. The it explains what does the universe consist of. 73% of it is a dark energy, this dark energy holds everything apart. 23% is dark matter, it helps hold the galaxies in place. Finally, 4% of the universe we know.
