Senior Drivers!

Your future is in jeopardy. A disturbing situation is developing in the United States.

Since people are living longer, the number of drivers over 65 is escalating three times as rapidly as the general driving

Acces PDF Survival Guide

population. Older people have difficulty concentration, shorter attention spans and failing vision among other ailments.

Unfortunately this results in frequent driving mishaps, sometimes with catastrophic results. Taking

Acces PDF Survival Guide

away their driving privileges would deprive them of their self esteem and independence. This could happen if they continued to have accidents caused by their propensity to get distracted easily and lose concentration. Some states have

Acces PDF Survival Guide

already enacted laws requiring re-exams for seniors.

No doubt many more will follow.

Driving slower in traffic is not the answer. This could cause accidents.

Driving too fast would be worse since a person's attention span and reaction time

Acces PDF Survival Guide

deteriorate with age. It does not matter how skillful he or she once were, aging diminishes skill in almost all areas including the operation of a motor vehicle. Driving today has become more complex as many more cars are on

Acces PDF Survival Guide

the road. When seniors started to drive, turnpikes and expressways were non existent. After observing the avoidable accidents seniors were having, and realizing how their ranks were exploding, I decided to write "The Senior
