The sixth Jack Daniels mystery opens at a funeral. While Jack stands graveside, tears in her eyes, her cell phone rings. It's the killer, escaped maniac Alex Kork, taunting Jack, drawing her ever further into a twisted game of cat and mouse. Because, while Alex is more than willing to kill random victims, Jack is her true prey. But which woman wants revenge more?--From publisher description.

In an interconnected world, national economic policies regularly lead to large international spillover effects, which frequently trigger calls for international policy cooperation. However, the premise of successful cooperation is that there is a Pareto inefficiency, i.e. if there is scope to make some nations better off without hurting others. This paper presents a first welfare theorem for open economies that defines an efficient benchmark and spells out the conditions that need to be violated to generate inefficiency and scope for cooperation. These are: (i) policymakers act competitively in the international market, (ii) policymakers have sufficient external policy instruments and (iii) international markets are free of imperfections. Our theorem holds even if each economy suffers from a wide range of domestic market imperfections and targeting problems. We provide examples of current account intervention, monetary policy, fiscal policy, macroprudential policy/capital controls, and exchange rate management and show that the resulting spillovers are Pareto efficient, as long as the three conditions are satisfied. Furthermore, we develop general guidelines for how policy cooperation can improve welfare when the conditions are violated.

New York Times bestselling author Lauren Tarshis provides a birds-eye view of one of America's most ghastly accidents ever be captured on film, the Hindenburg Disaster of 1937.
