key principles and current practices, from patient registration to claims submission. Now updated to reflect the latest trends, technology, terminology, legal and regulatory guidelines, and coding systems—including ICD-10—the new edition also features a dynamic full-color layout. The text also includes abundant exercises, examples, case studies, and activities focused on real-world applications, including step-by-step procedures for generating, processing, and submitting health insurance claims to commercial, private, and government insurance programs. An access code for SimClaim interactive online billing software is also provided; this program puts billing skills to the test with case studies that require form completion. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This combination textbook and workbook, explains each phase of the medical claim cycle, from the time the patient calls for an appointment until the financial transaction for the encounter is completed. Coverage includes types of insurance payers, basic coding and billing rules, and standard requirements for outpatient billing using the CMS-1500 claim form. It also emphasizes legal aspects related to each level of the medical claim cycle and the importance of the medical office employee, showing their responsibility

for and impact on successful reimbursement. 3 separate chapters offer coverage of the basic concepts of medical coding. A comprehensive overview of the CMS-1500 claim form with step-by-step guidelines and illustrations thoroughly covers reimbursement issues and explains the billing process. Includes detailed information on various insurance payers and plans including Medicare, government medical plans, disability plans, private indemnity plans, and managed care. Stop & Review sections illustrate how the concepts presented in each chapter relate to real-life billing situations. Sidebars and Examples highlight key concepts and information related to the core text lesson. A companion CD-ROM contains sample patient and insurance information that readers can use to practice completing the accompanying CMS-1500 claim form, as well as a demonstration of Altapoint practice management software. Features completely updated information that reflects the many changes in the insurance industry. Contains a new chapter on UB-92 insurance billing for hospitals and outpatient facilities. Includes a new appendix, Quick Guide to HIPAA for the Physician's Office, to provide a basic overview of the important HIPAA-related information necessary on the job.

version.

Understanding Health Insurance, 12th Edition, is the essential learning tool your students need when preparing for a career in medical insurance billing. This comprehensive and easy-to-understand text is fully-updated with the latest code sets and guidelines, and covers important topics in the field like managed care, legal and regulatory issues, coding systems, reimbursement methods, medical necessity, and common health insurance plans. The twelfth edition has been updated to include new legislation that affects healthcare, ICD-10-CM coding, implementing the electronic health record, the Medical Integrity Program (MIP), medical review process, and more. The practice exercises in each chapter provide plenty of review, and the workbook (available separately) provides even more application-based assignments and additional case studies for reinforcement. Includes free online SimClaim™ CMS-1500 claims completion software, and free-trial access to Optum's EncoderPro.com—Expert encoder software. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"COMPREHENSIVE HEALTH INSURANCE: BILLING, CODING & REIMBURSEMENT, 2/e" provides students with the knowledge and skills needed

Download File PDF Understanding Health Insurance Book Only

to work in a variety of medical billing and coding positions in the medical field. Comprehensive in approach, it covers the foundations of insurance, billing, coding and reimbursement. Students learn not only the submission of claims to the insurance carrier, but also reviewing medical records, verifying patient benefits, submitting a secondary claim, posting payments and appealing the insurance carrier's decision. This edition includes new chapters devoted to HIPAA and ICD-10-CM Medical Coding, as well as outstanding coverage of electronic records. Numerous case studies and patient files are included throughout and demonstrate refunds and appeals, auditing and compliance, Medicare calculations and professionalism.
