Everyone experiences weather. In this fascinating book, scientist Donald DeYoung explores 101 intriguing questions about weather patterns and phenomena, answering them from the biblical viewpoint of a creation planned for our well-being. Questions about weather basics, like What causes a rainbow? and Is there a creationist view of the weather? along with questions about past weather, such as Was there an ice age? and Did a climate change end the dinosaur era? are answered in order to reveal the order and grandeur of creation and encourage an appreciation of all God has made. This introduction to commonly asked weather questions affirms God's power and illustrates the Creator's provision for the earth's weather system. Perfect for Sunday school teachers, parents, and homeschoolers.

Presents a variety of facts, questions and answers, and riddles about the weather.

Enhanced with fullcolor illustrations, this informative book provides young readers with answers to commonly asked questions about such things as acid rain, global warming, hurricanes, and more.

From the author of Dept. of Speculation, a dazzling and deadpan new novel about hope and despair, fear and comfort as it plays out in these times of environmental and political turbulence

'Clear, succinct and engaging answers to every question you could ask about the weather.' Gavin Pretor-Pinney, author of The Cloudspotter's Guide Why doesn't rain fall all at once? Can technology change the track of a hurricane? What's the weather like on other planets? Meteorologists Simon King and Clare Nasir reveal the captivating ways the weather works, from exploring incredible weather phenomenon (how are rainbows formed?), expertly breaking down our knowledge of the elements (could we harness the power of lightning?) to explaining the significance of weather in history (has the weather ever started a war?) and discussing the future of weather (could climate modification save the planet?). In What Does Rain Smell Like? Simon and Clare uncover the thrilling science behind a subject that affects us all. They unearth and analyse all aspects of the weather and how it changes our lives through answering our most curious questions about the world around us.

Answers questions about such everyday aspects of the weather as rain, snow, wind, fog, and heat, and briefly looks at methods of weather forecasting.
